

Word Finder

Event Premise

How creative are you when it comes to an argument? Well, this game is sure to test your creativity and speaking ability both at the same time. The event is a GD with a twist – each student will be given a word privately, and then the GD topic is given. What’s more, the word given is poles apart from the GD topic.

Event Format

The participants then have to use the word in their arguments in the GD (groups of 7 or 9); which will be a 2 rounds of 1 minute each. The more times the participant uses the word, the greater his /her score. At the end of the GD, each participant has to guess the words given to the other person. For each person who guesses his/her word correctly, the points of the participant are reduced. In addition, if more than half the other students guess the word, an extra penalty is levied and if all the others get the word, a higher penalty is levied.

Evaluation Criteria

- Each time the word is used, the participant earns 5 points.
- Each correct guess of another participant reduces the score by 10 points
- Half of the participants guess correctly – extra penalty of 25 points
- All guess correctly – additional penalty of 50
- In case points come to the same, the person with the higher number of correct guesses is the winner.
- In case even that is a tie, quality of linkage of the word and the topic at hand is evaluated.
